RALEIGH  
100 YEARS  
OF WINNING  
1887-1987

# RALEIGH

For a hundred years since 1887 Raleigh has always been identified with the highest standard in cycle manufacture. Continual involvement in cycle sport at the highest levels have ensured innovation and technical advance.

Sir Frank Bowden, founder of Raleigh, recognised the value of success in cycle sport, he encouraged leading champions of every nation to ride Raleigh. In 1892 alone, 2,300 competition successes were achieved - 75 by the American champion Arthur Augustus Zimmerman alone. His Raleigh weighed only 24½ lbs (⅓ weight of his previous bike). In 1893 "Zimmy" became World Amateur Champion.

Following his two Olympic medals in 1948, Reg Harris became a Raleigh professional rider and he won the World Professional Sprint Championships in 1949, 1950, 1951, 1954. During the late 70's and early 80's the successes of the Peter Post Raleigh Professional Team were legendary.

**1977** Didi Thurau - Tour de France Yellow Jersey holder for 14 days.  
**1977** Hennie Kuiper - 2nd over-all Tour de France.  
**1978** Jerrie Knetemann - World Road Champion and 9 stage wins Tour de France.

**1979** Jan Raas World Road Champion.  
**1979** Bert Oosterbosche World Pursuit Champion  
**1979** 6 stage wins Tour de France.

**1979** Raleigh World Cup Team.  
**1980** Joop Zoetemelk winner Tour de France.

**1982/3** World Cup 2 successive years victory.

**1986** Two further victories have been notched up in the UK. National Criterium Champion 1986 - Paul Sherwen. (See Front Cover). National Road Champion 1986 - Mark Bell.

(see opposite picture)  
**1887 - 1987 100 YEARS OF WINNING**

## LIGHTWEIGHT REYNOLDS CYCLE TUBING

These stickers appear on the frame and, where relevant, on forks.

501 cromalloy-M tubing, butted for lightness and strength. Made from Chrome Molybdenum with a high manganese content. It out performs all competitive tubing in its category.

Reynolds latest tube-set. All that 501 has to offer plus the SL indicates that backstays, chainstays and fork blades are "taper gauged" to reduce overall set weight.

Reynolds 531 is the famous lightweight Manganese Molybdenum alloy tubing acclaimed over 50 years of cycle racing. Tubes are butted which allows for lightness whilst maintaining strength where it matters in the join at the lugs. A tube set designed specifically for lightweight touring, with improved weight characteristics and high performance stays to take the strain of heavy pannier loads.

Reg Harris Poster 1892

Raleigh 1982 World Cup Team

## HAND BUILT BY CRAFTSMEN

Each model is hand-assembled by individual craftsmen. The exclusive touch: a card, with your bike, signed by the man who actually built it (not on Criterium, Record Sprint or Zenith).

## SHOWING THE FLAG

The chequered flags appear against each model featured in these pages. This is a visual guide to the performance and specification you can expect from the cycle concerned. Two flags for instance denotes a cycle with Reynolds lightweight tubing and good lightweight equipment ideal for the new cycle sportsman or young racer. Six on the other hand signifies a model embodying the most sophisticated alloy equipment with a totally lightweight frame and crammed with extras.

## RALEIGH SPECIALIST LIGHTWEIGHT DEALER

After you've perused this catalogue - and tentatively chosen the cycle, or cycles, you'd like to see - call on your Specialist Lightweight Dealer. He has the range and the information that'll help you make up your mind.

### THE RALEIGH 15 YEAR GUARANTEE

Every bicycle in this catalogue carries the Raleigh 15 year guarantee on frame and forks plus a 1 year guarantee on all other components. See the Raleigh Bicycle Guide for details.

### CRITERIUM

### CRITERIUM 12

Great Value in 501, the attention to detail on this Triathlon styled racer is not normally found on other bikes at this price level. Fully adjustable single bolt seat pin, twin bottle cages and bottles, alloy Quick-Release wheels, alloy platform pedals, and aero brake levers are combined with the new tri-sport ideas in design to produce a totally balanced machine. Criterium is the ideal bike for the new cyclist training for fitness or the keen triathlete beginning the sport.

Colour : Deep Metallic Blue.  
See Page 14 for full spec.

FRAME SIZE	INSIDE LEG
54 cm (21")	31-34"

64 cm (25")	35-38"

### RECORD SPRINT 12

Now featuring the latest generation 501 frame design, with twin bottle mounts, pump peg under top tube, and its own complement of braze-ons. Its incredible spec: Reynolds 501 cromalloy-M main tubes, plus a full complement of alloy components. This makes the Record Sprint one of the most stylish bikes anywhere.

Colour : Gloss Black with Gold Graphics

## SIROCCO 12

A handbuilt machine employing Reynolds 501 double-butted cromalloy-M main tubes-used to effect in our totally new frame geometry. With its full alloy Shimano 12-speed transmission and top-grade alloy components, Sirocco is one of the finest racers of its time. Finished in Oyster with Wine Decor.  
See page 14 for full specification

FRAME SIZE	INSIDE LEG
54.5 cm (21½")	31-34"
57 cm (22½")	32-35"
59.5 cm (23½")	33-36"
62 cm (24½")	35-38"

"The Sirocco's design and finish is up to a standard usually only found on bikes twice this price. The paint design is simply stunning".  
Bicycle Magazine. Test Report April 1986

## COMPETITION 12

For the sportsman or club rider. Use of a full Reynolds 501 SL Chrome Moly tube set makes for a taut and responsive ride. Now with the completely "new" Shimano 105 full ensemble. Competition is a totally balanced, integrated design and engineering solution for those expecting the best out of their machine.  
Colour: Platinum Grey with Silver Decor  
For full spec see page 14

FRAME SIZE	INSIDE LEG
54.5 cm (21½")	31-34"
57 cm (22½")	32-35"
59.5 cm (23½")	33-36"
62 cm (24½")	35-38"

"You must consider this one if its in your price bracket. A contender for the overall top 10 of 1986 and nice to see a British built bike that takes on the continentals at the style business. The frame detailing and finish knocks Bianchi, Falcon et al into oblivion".  
Bicycle Magazine. April 1986

## WORLD CHAMPIONSHIP COLOURS

The Famous Rainbow Colours (Blue, Red, Black, Yellow, Green) only worn by World Champions.  
Raleigh's 6 World Championships since 1977 illustrate the quality of the Raleigh Pedigree.

## TRIATHLON

This model is specifically designed as an "off the peg" model for triathletes new to cycling, offering an outstanding combination of top quality equipment and a responsive frame design.

### Frame/Fork

A slightly longer wheelbase than our normal racing geometry, the handling is more predictable and stable, and allows the rider to concentrate more on speed than on controlling the bike in a straight line. The stiffness of the rear triangle, however, ensures that there is no loss of power transmission when stomping hard on the pedals. Frame and fork ends are fitted with eyes to enable mudguards to be fitted for winter training, and clearances are sufficient for a narrow lightweight guard with no toe clip overlap when correctly adjusted. Main frame tubes are 531 butted, with taper gauge 531 fork blades.

### Wheels

Hollow section Weinmann rims are used for strength and rigidity, and are shod with Pro-Lite tyres, which are not only extremely light in weight but also have very low rolling resistance on the road. The soft Kevlar bead makes them easy to fit and remove, and of course they can be folded if a spare is carried.

### Transmission

Derailleur gears are Shimano New 105 with indexed levers, ensuring perfect gear changes every time. The New 105 chainset features Bio-Pace chainrings, giving improved pedalling efficiency with an action that more closely matches the cadence of the human legs when walking or running.

The pedals are very special - a wide platform design offering full foot support, with a detachable plate allowing use with conventional cycling shoes with cleats when removed, and running/training shoes when in place. Gearing is also slightly wider than normal racing ratios, which together with the Bio-Pace chainrings optimises performance opportunities.

### Saddle

A new design from Selle Royal; the narrow styling reduces chafing, whilst the special covering material improves grip on wet clothes. The nylon chassis also incorporates a sprung area ensuring the best combination of support and comfort.

### Other Features

Twin bottles are fitted as standard, and the direct fit pump is accommodated under the top tube. Handlebar size varies with frame size - 400mm

width/medium drop on 54 and 57 cm sizes, 420mm width/medium drop on 60 and 64 cm sizes. Aero brake levers feature comfortable ergonomically designed covers for "on the hoods" riding, and the cushion tape provides a comfortable grip for other positions. (The brake cable is tucked away into a wedge shaped foam piece to eliminate the normal discomfort of cables under handlebar tape). Colour: Citron.

See Page 14 for full spec.

FRAME SIZE	INSIDE LEG
54 cm (21")	31-34"
57 cm (22½")	32-35"
60 cm (23½")	33-36"
64 cm (25")	35-38"

For the triathlete who is also a more experienced cyclist, we would recommend either the Competition or Road Ace models. Both these models feature full race geometry and conventional gearing (both still with SIS indexed derailleur systems), and include twin bottle mounts as standard.

## ROAD ACE 12

The ultimate in racing hardware. Complete with a hand-built frame in Reynolds 531C tubing, a full Shimano 600 EX ensemble with SIS gears, twin bottle mounts, Campagnolo forged ends and long point Super Leger lugs. The Road Ace is designed for the sportsman who insists on a top quality machine.  
Colour : Polar Blue  
See Page 14 for full spec.

54.5 cm (21½")	31-34"
57 cm (22½")	32-35"
59.5 cm (23½")	33-36"
62 cm (24½")	35-38"

ROAD ACE  
"The Road Ace is a thoroughbred that exemplifies the maxim, "If it looks right, it is right".  
Cycling World. Test Report Nov 1986.

A new term for a new type of cycle. Cyclo-Sportif plays many parts. Fast training bike, speedy tourer, or general sports machine. Just whatever you want it to be. Clever design ensures that Cyclo-Sportif gives you the speed of a lightweight racer without the often harsh ride you'd expect from such.

## VENTURA

The frame geometry and the top quality alloy specification put Ventura way out ahead. With Quick-Release wheels, narrow section tyres, a 12 speed gear and mini-toe-clips. Colour: Aqua blue with Silver Decor. See Page 14 for full spec.

## RECORD ACE

Hailed as "the return of the great British sports bike" the Record Ace is the summit of Cyclo Sportif high performers. Built with Reynolds 531 butted main tubing and 531 fork, and equipped with a full complement of top-of-the range Shimano 600 EX components - including a 12 speed gear. Further assets include classic Weinmann brakes and levers, plus 700C Alloy Weinmann rims. Finished in Brown and Champagne. One of the finest training and sporting bikes money can buy.

## ZENITH 10

A lightweight tourer or commuter with a very keen price tag. Reynolds 501 Butted main tubes produce a light, strong touring frame that is the ideal basis for Zenith's alloy componentry which has been added to make Zenith as well equipped as more expensive machines. Colour: Aqua Blue with Silver Head specification. See page 15 for full spec.

64 cm (25")	35-38"

## GRANADA 10

The heart of the Granada is a top quality frame of Reynolds 531 butted main tubes with a Reynolds 531 fork, giving a light and responsive ride. The specification includes a 10 speed lightweight gear set, quick release alloy wheels, a rear alloy carrier and lightweight guards. The new alloy touring pedals, a fluted alloy seat pin (with single bolt adjustment) and an anatomic saddle make the new Granada the perfect all purpose/long distance touring bike.

Available in Gents and Ladies specification

GRANADA

"Has most of the features you would expect to see on a good quality touring mount costing much more. The Granada does not pretend to be a touring machine - it is one".  
Bicycle Times. Test Report Sept 1986.

## ROYAL 18

Everything about the Royal is right, from the Full Reynolds 531ST Frame to the Michelin Select Touring profile tyres and leather covered anatomic saddle. The Royal is equipped with powerful alloy cantilever brakes, alloy chainset with fully detachable chainwheels and Shimano Light Action pre-select gears. The other superlative componentry shows that the Royal 18 is no ordinary touring bike.

Colour : Deep Metallic Red with Silver Head.

# JOURNEY to the

TWO bicycles handbuilt at Ilkeston by the Raleigh Lightweight Unit have just returned from a 3,294-mile journey to the 'Centre of the Earth'.

That's the name given to the land most remote from any sea — on the north-western edge of the Dzungarian desert just a few miles from the sensitive Sino-Soviet border.

The journey, which began near the port city of Chittagong in Bangladesh, was made by Richard and Nick Crane in 58 days. Up the Ganges, over the Himalayas to China's most northwesterly province Xinjiang Uygur Zizhiq.

No service or spares back-up.  
No supplies or food carried.

MAVERICK 18 PRO

## MAVERICK 18 PRO

This is the last word in All Terrain Bikes. The Super Light Reynolds 531 ATB frame and forks are built in Raleigh's own Lightweight Unit and designed by Gerald O'Donovan, one of the world's experts in bicycle design. With forged alloy triple chainset and Suntour Mountech 18 speed gears, Nitto alloy stem and Dia Compe cantilever brakes. See Page 15 for full spec. Colour: Beaver and Champagne.

### FRAME SIZE

# centre of the earth...

## RANDONNEUR

the ultimate touring bicycle from Raleigh

### KEY FEATURES

#### Frame

New design with full Reynolds 531 ST tube set and Shimano forged vertical dropouts.

#### Fork

Forged crown with 531 blades and Shimano double eyelet forged ends.

#### Brakes

Shimano Cantilever with lined cables and 600 EX levers.

#### Wheels

Maillard sealed bearing 600 CX quick release hubs offer high protection against water and dirt ingress into the bearings. Rims are Mavic M3CD hard anodised hollow section for maximum rigidity, and the stainless spokes are single butted 13/14 gauge at the rear for strength.

#### Transmission

The chainset is the Shimano Bio-Pace Luxe with forged 170mm alloy cranks. The derailleur is from Huret - the all alloy New Success with long cage, offering the best combination of lightweight, rugged styling and consistent gear changing, thanks to its double pivot design.

#### Saddle

A good leather saddle is the touring man (and woman's) choice. New from Brooks, with its own unique styling is the honey-coloured Professional saddle. The version fitted to the Randonneur is

pre-softened to accelerate the breaking in process. The saddle is mounted on an alloy seat pin with single bolt fore/aft and tilt adjustment.

#### Carriers

Showa alloy carriers are fitted; the front is low-rider style with mounting points brazed on to the fork; the rear 3 point fixing to ensure accurate positioning with rigidity, and no weak links.

#### Pedals

The Shimano PD-T100 is a uniquely styled platform pedal offering the option of using either broader training/walking shoes or, by removing the plastic insert, conventional cycling shoes with cleats. Toe clips and toning leather straps are naturally provided.

#### Accessories

The bicycle also comes complete with durable impact resistant mudguards, a pump, and twin feeding bottles and cages mounted on brazed-on bosses. Two spare spokes are carried on brazed-on mounts on the chainstay, and these also serve to protect the chainstay from damage by the chain.

Other Features	Black/Silver frame fitting initiator. Christophe toe clips with tan straps. Showa front low rider and rear alloy carriers. Twin Bottles and cages.
Approx Weight	29 lbs. (60 cm frame).
Colour	Gummated Grey with White peak head.

# SPECIALIST BICYCLE DEVELOPMENT UNIT — NOTTINGHAM

Raleigh SBDU is a vital part in the research and development behind the art of making and designing all types of bicycles. Under the guidance of Gerald O'Donovan — a world famous name in cycle design — the SBDU has been responsible for bikes that have won:

- 6 World Championships since 1977
- 13 National Road Championships since 1974
- 14 National Pro Track Championships since 1974
- 6 European Championships since 1975
- 5 World Cup Teams since 1975
- 28 Classic Wins since 1975
- 65 Tour de France Stage Wins and 8 Team awards since 1976
- 45 Other International Tour Wins

The Raleigh SBDU not only builds framesets for the out and out race professional in the ultra light Reynolds 753 tubing and the super tough 531, but also for those cyclists who really want the very best — from sporting cyclist to casual tourer. All frames are individually built to order to your own measurements — so that you get a perfectly balanced, perfectly crafted frame made to measure. Almost everything imaginable is available and possible, from brazed-on fittings to low profile road or track machines. Why not visit the SBDU at Nottingham to make sure the frame you order is exactly the right size. As you can see by the illustration all of the angles are critical — and seldom are they the same for people of the same height because of varying leg length, trunk length, arm length etc.

This catalogue is one of a set of 6 available free from your Raleigh dealer.

What you see here is the 753 "Services des Courses" road frame, the definitive frame for competition at International level — ridden all over the world by thousands of professionals as well as discerning club riders. The lugs, fork crown, and bottom bracket are Cinelli, the tubing is the finest Reynolds 753R (also available in 531C, the choice is yours depending on your budget). The frame is available with a full complement of braze-ons and in a range of colour finishes.

For full details contact your Specialist Lightweight Dealer.
